Office Action Summary

Art Unit: 2817

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 4-5, drawn to an H-bridge controller classified in class 330, subclass 251 and claim 6, drawn to a digital amplifier, classified in class 330, subclass 10.
 - II. Claims 1-3, drawn to a modulator, classified in class 375, subclass 254.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I (claim 6) and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 6 does not specify any details of the modulator. The subcombination has separate utility such as a delta sigma modulator for a variety of applications.
3. Inventions I (claims 4-5) and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a switching amplifier for a variety of applications. See MPEP § 806.05(d).

Art Unit:

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Mottola whose telephone number is (703) 308-4914.
